

THE UNIVERSAL BASIC INCOME UBI+ 100%

PEACE + FREEDOM + JUSTICE + TIME + DEMOCRACY

THE NEW GENERATION CONTRACT THAT CONNECTS PEOPLE AND COUNTRIES.

WITH THE UBI+ PEACE, FREEDOM AND PROSPERITY CAN BE MADE POSSIBLE FOR ALL PEOPLE OF THIS WORLD.

AS SOON AS SOCIAL AND FINANCIAL SECURITY IS GUARANTEED, THE GOOD IN PEOPLE CAN ALSO COME TO LIGHT.

Based on the model – **UBI+** – people from all over the world have set themselves the goal to introduce a humane UBI in all countries of the world.

CONCEPT OF THE MODEL “UBI+”

– INDIVIDUAL LEGAL CLAIM

Regardless of whether you live alone or with others, whether you are married or not.

– WITHOUT EXAMINATION OF NEEDINESS

Everyone has a right, regardless of income and wealth.

– UNCONDITIONALLY

Without consideration it is – like love – granted unconditionally or without any string attached.

– SECURING EXISTENCE AND PARTICIPATION

It ensures existence and full participation in social and cultural life.

– SOCIAL INSURANCE

It guarantees the best accident and health insurance for all people. Enhancing the freedom and dignity of individuals.

– CARE MONEY FOR SPECIAL NEEDS

The UBI is increased by 20% per care level.

– IMPENDABLE

– VALUE GUARANTEED

– AMOUNT OF UNCONDITIONAL BASIC INCOME

Calculation formula:

the minimum security or minimum wage

plus 100% wealth share

= **UBI+**

– PAYOUT DEPARTMENT

The payment point can only ever be located in one country in order to avoid double payments – regardless of where you live. And that is where the country of origin of the citizen is decisive. In the case of dual citizenships, the place of birth is decisive.

FINANCING

In the first phase through an extensive administrative, political and tax reform.

In order to successfully introduce the idea of a humane **unconditional basic income** according to the model – **UBI+** – also in your country, we now need your help.

Be part of the movement and **show your face!** – or **participate.**

The **UBI+** connects countries and people and can make peace, liberty and prosperity possible for all humans of this world.

3 phases that bring us to a worldwide UBI:

1) National UBI (*first phase*)

– Each country introduces its own individual UBI, which could be based on the criteria of the model “UBI+”.

2) Continental UBI* (*second phase*)

– From the moment that there is a national UBI in each country of a continent, the country with the highest rate is used to transfer this to all other countries, so that from now on a uniform rate applies to the entire continent.

The national banks transfer the UBI directly to the citizens.

3) Worldwide UBI (*third phase*)

– Once all countries in the world have at least one national UBI or are already within a continental UBI, a globally uniform UBI will be launched. All countries will then be raised to the highest UBI to enable equal conditions throughout the world – which would mean the beginning of a free and peaceful world for all people.

The National Banks transfer the UBI directly to the citizens.

* Start of the **monetary system reform** – whereby sufficient money will be available.

Questions and answers

QUESTIONS AND ANSWERS ABOUT THE UBI+ 100%

The **universal basic income UBI+** stands for livable society including health care and long-term care insurance at the highest medical level, value secured for all people from birth to death.

Will an unconditional basic income bring even more foreigners into the country?

This is not to be expected, as foreigners are only entitled to the UBI if they have lived and worked legally in the country for at least 3 years.

And how are refugees treated?

Refugees will receive benefits in kind to get the help they need. In addition, laws must be enacted so that refugees can work in a regular manner as soon as possible. This also means that they no longer incur any costs.

Will the universal basic income abolish the welfare state?

No, of course not. Our model UBI+ which is built as a basic right into the constitution, modernizes and simplifies our welfare state, in order to get the present high costs under control and to give social dismantling and poverty in the future no more chance.

Will needy people then receive less?

No, no one will receive less than they do today.

Will the nursing allowance then be abolished?

No, per care level the UBI+ model will increase by 20% per care level. This creates absolute freedom as to whether the person in need of care is cared for at home or in a nursing home.

Does it even make sense to introduce an universal basic income in only one country?

Yes, of course this makes sense. Since there is still poverty and homelessness, we see that in the current system something is not quite right. We have to show how easy it can be to implement a humane UBI and what positive effects it could have for society as a whole.

We are in intensive contact with other countries in and outside Europe in order to make a European basic income possible as a second step and a worldwide basic income possible as a third step.

What will change in current pensions?

Since an universal basic income replaces the existing pension system, all pensions that receive less than the UBI will increase to the UBI level and already acquired higher pension entitlements will simply continue to be paid out.

Who will still be working?

All of them - since every activity is also a job. Money is just one of many reasons why people do something. Most working hours have always been done unpaid, even today: in the household, caring for relatives, raising children or volunteering.

People work because they want to do something meaningful, want to achieve something special or just to get recognition.

The universal basic income ensures for the first time that every person can be human again. With the UBI, sustainable economic cycles have a real chance.

Doesn't everything then become more expensive?

Every year almost everything becomes more expensive - this is called inflation. The problem that everything becomes more and more expensive is due to the existing monetary system itself. We are aware of this system error and will remedy it in the second phase by reforming the monetary system.

How high is the UBI for children?

In the case of minors, the UBI is paid out in two parts.

Parents of minors receive 50% of the UBI for adults.

The remaining 50% will be saved and transferred to the child's own account at the age of 18 to ensure an ideal start to adult life.

Do foreigners also receive the UBI in our country?

In principle, all citizens receive the UBI - on the basis of the EU law on freedom of movement - the following regulation will apply to foreigners.

Foreigners will also receive a UBI if they do so:

On the cut-off date (*day of introduction*) they have already lived legally in the country for at least 10 years. Or have worked legally for at least 3 years.

After the deadline, you must have worked legally in the country for at least 3 years to be entitled to the UBI as a foreigner.

The UBI is only valid for foreigners as long as they are in the country.

If there is also a UBI in the country of birth, the foreigner loses the right to the UBI, as there can only be one payment office (*see criterion 10*).

Can I also live abroad for a few years and obtain the UBI?

Yes, of course. The UBI gives people the freedom to live a self-determined life and to decide where and how they want to live.

Good idea? If so, then we look forward to your support.

NATURAL MONEY SYSTEM

CURRENT MONEY-SYSTEM

Money is today seen as a cycle that has to circulate.
today you have to take something away
from people through taxes (*tax revenue*)
to give it to other people about
tax expenditures (*social benefits*)
or to invest it (infrastructure, schools, administration, etc ...).
This procedure is limited in itself.

FUTURE MONEY-SYSTEM

**Money is seen as a river that has to flow.
Without taxes and without interest.**

An **Universal Basic Income** is paid directly to all people via the national banks – so that they can develop freely.

All other government expenditures are serviced via the National Bank.

For free people, peace, justice and natural economic cycles.

Good idea? If so, then we look forward to your support.
